MOLECULAR IMPRINTS WINS 2004 SMALL TIMES MAGAZINE BEST OF SMALL TECH COMPANY AWARD

Austin, TX, November 15, 2004 – Molecular Imprints, Inc. received the 2004 Small Times Magazine Best of Small Tech Company Award. Dr. Norm Schumaker, Molecular Imprints' President and CEO, was a runner-up for the Business Leader of the Year as well.

The 2004 Small Times Magazine Best of Small Tech Awards recognize the best people, products and companies in nanotechnology, MEMS and microsystems.

"The explosive growth in nano- and micro-enabled products across all industries has ramped up this competition considerably," said Steve Crosby, President and Publisher of Small Times Media. "This year's winners and runners-up represent game-changing technologies; the kind of products and inventions that are allowing small tech to impact our daily lives."

Molecular Imprints is the leading manufacturer of Step and Flash Imprint Lithography (S-FIL™) technology.

The recipients of the Small Times Magazine Best of Small Tech Awards, along with the runners-up, were selected by nominations and applications submitted by companies and individuals. Small Times Media news staff and an industry panel of experts reviewed the applicants and selected one winner and four runners-up in six categories, plus lifetime achievement. The panel considered accomplishments between September 1, 2003 and October 1, 2004.

About Molecular Imprints

Molecular Imprints, Incorporated (MII) develops and manufactures nano-lithography systems for high resolution and for 3-dimensional pattern replication. The company has commercialized a unique Step and Flash Imprint Lithography technology (S-FIL), which is a simple step and repeat, room temperature, low pressure, nano-imprint process that has demonstrated sub-20 nanometer resolution. Molecular Imprints provides enabling lithography systems and technology for manufacturing applications in the areas of: nano-devices, micro structures, advanced packaging, bio-devices, optical components and semiconducting devices. For more information, visit: www.molecularimprints.com.

About Small Times Media

Small Times Media LLC is the leading source of business news and information about nanotechnology, MEMS and microsystems. The company offers full news coverage through its bimonthly magazine, *Small Times*®, daily news Web site, www.smalltimes.com, a weekly e-newsletter, *Small Times Direct*™ and a paid news service, *Small Tech Advantage*. Small Times Media also offers custom research, based in part on the most accurate and comprehensive database in the industry. Small Times Media is headquartered in Ann Arbor, Mich., USA.
